Backend Developer

Reduced API response time by 60% through asynchronous processing and query optimization. Skilled in system design, database management, and deployment workflows. Has 6+ years of experience as a Backend Developer across finance and SaaS. Focuses on building infrastructure that scales without sacrificing reliability.

WORK EXPERIENCE

Backend Developer 10/2023 – Present
Pacific Bell Inc.

- Architected and deployed a microservices ecosystem using Rust and gRPC, reducing API latency by 78% and enabling the platform to handle 3.5M concurrent users during peak traffic events
- Spearheaded the adoption of GitOps workflows with Argo CD and Terraform, decreasing deployment times from hours to under 8 minutes while improving infrastructure reliability by 99.98%
- Led a cross-functional team of 7 engineers to implement a real-time data processing pipeline with Apache Kafka and Flink, processing over 2TB of daily data and cutting analytics delivery time from days to seconds

API Developer 05/2021 – 09/2023
Cascade Consulting

- Redesigned authentication system using OAuth 2.1 and JWT with hardware security modules, eliminating credential-based attacks and reducing user login friction by 42%
- Optimized PostgreSQL database performance through custom indexing strategies and query refactoring, cutting average response times from 1.2s to 85ms while handling 3x more transactions
- Developed and integrated a GraphQL API layer with Apollo Federation that unified 6 disparate data sources, enabling frontend teams to ship features 40% faster during Q3 product launch

Database Developer 08/2019 – 04/2021
Apex Innovations

- Built RESTful APIs using Node.js and Express that powered core business functionality, achieving 99.9% uptime and supporting 150K daily active users
- Implemented automated testing suite with Jest and Cypress, increasing code coverage from 62% to 91% and reducing production bugs by 47% within six months
- Collaborated with DevOps to containerize backend services using Docker and Kubernetes, streamlining the local development environment and cutting onboarding time for new developers from 2 weeks to 3 days

SKILLS & COMPETENCIES

- Microservices Architecture Design
- Real-Time Payment Processing Systems
- API Security and Authentication Frameworks
- Financial Data Pipeline Optimization
- Distributed Systems Performance Engineering
- Risk Management Algorithm Development
- Regulatory Compliance Implementation
- Kubernetes
- Apache Kafka
- Redis
- PostgreSQL
- Event-Driven Architecture with AI Integration
- Quantum-Resistant Cryptography Implementation

COURSES / CERTIFICATIONS

Microsoft Certified: Azure Developer Associate 9/2022
Microsoft

EDUCATION

Bachelor of Science in Computer Science 2015–2019
San Francisco State University , San Francisco, CA

- Computer Science
- Engineering
